

Since the dataset was too large, it was not feasible to upload the dataset here.

About Dataset Description

This is a countrywide car accident dataset, which covers **49 states of the USA**. The accident data are collected from **February 2016 to Dec 2021**, using multiple APIs that provide streaming traffic incident (or event) data. These APIs broadcast traffic data captured by a variety of entities, such as the US and state departments of transportation, law enforcement agencies, traffic cameras, and traffic sensors within the road-networks. Currently, there are about **2.8 million** accident records in this dataset. Check [here](#) to learn more about this dataset.

The link for the Dataset has been provided below:
